

Ariel Resendiz

Software Engineer

(619) 597-9537 | resendiz.ariel6@gmail.com |

LinkedIn: linkedin.com/in/ariel-aguilar-815707384 | GitHub: github.com/resenaros

Full-stack Software Engineer with a backend focus, specializing in Python (Flask) and Node.js for REST APIs and relational databases (PostgreSQL, MySQL). Experienced with modular back-end architectures using SQLAlchemy, Marshmallow, Redis, and Swagger/OpenAPI, and integrating AI/RAG tooling (LangChain, vector databases) into applications. Proficient in React, TypeScript, and Vite for responsive front ends. Skilled in automated testing (pytest, Jest, React Testing Library) and deploying Dockerized services with CI/CD pipelines using GitHub Actions (pip-audit, CodeQL) in Agile/Scrum environments.

TECHNICAL SKILLS

Programming Languages:

Java (JDK 25), JavaScript (ES6+), Python, TypeScript, Bash

Backend:

Flask, Node.js, REST APIs, SQLAlchemy (ORM), Marshmallow (schema/validation), Modular Architecture, Swagger/OpenAPI, Redis

Database:

SQL (MySQL, SQLite, PostgreSQL), NoSQL (Firestore)

AI, MLOps, and Data Engineering:

Retrieval-Augmented Generation (RAG), LangChain, Chroma (vector DB), Gradio, Ollama (local LLMs), Hugging Face Spaces

DevOps & Automation:

Docker, Git, GitHub Actions (CI/CD, pip-audit, CodeQL), WSL, Vercel, Render, uv (Python dependency management), pandas

Web & Front-End:

React, Vite, HTML5, CSS3, Responsive Design, Bootstrap, Redux Toolkit, Context API, TanStack Query

Testing:

Test-Driven Development (TDD) with Jest, React Testing Library, pytest

Security:

OWASP ZAP, Auth0, JWT

Design & Collaboration:

Postman, Kanban, Lucidchart, Figma

Other:

Object-Oriented Programming (OOP), Bilingual: English & Spanish

Certifications:

[Coding Temple - Full Stack Software Engineer](#)

EXPERIENCE

Tech Resident, Software Engineering – Tech Residency

Coding Temple | Remote | DEC 2025 – FEB 2026

- Completed a competitive 8-week residency simulating real-world product development in a cross-functional Agile/Scrum environment.
- Focused on back-end engineering: built and maintained REST APIs using Python, Flask, SQLAlchemy, and PostgreSQL, emphasizing modular architecture and robust data models.
- Integrated security best practices with Auth0, JWT, and OWASP ZAP for authentication, authorization, and vulnerability assessment.
- Containerized services with Docker and implemented CI/CD pipelines using GitHub Actions to automate testing and deployment.
- Participated in code reviews, pull requests, and issue resolution, improving code quality and team collaboration.

Software Engineering Trainee

Coding Temple | Remote | MAR 2025 – SEPT 2025

- Developed secure, responsive front-end applications using React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, and Firebase Authentication, emphasizing responsive design, accessibility, and performance optimization.
- Built and maintained RESTful APIs using Python, Flask, SQLAlchemy (ORM), Marshmallow, and PostgreSQL/MySQL, implementing CRUD operations, data validation, and modular backend architecture.
- Applied test-driven development (TDD) and unit/integration testing using pytest, unittest, Jest, and React Testing Library to improve application reliability and code quality.
- Implemented CI/CD pipelines with GitHub Actions and Vercel, enabling automated testing, version control, and continuous deployment.
- Utilized AI-assisted development tools, logging, instrumentation, and debugging techniques to identify defects, improve performance, and accelerate issue resolution.

Asset Protection Coordinator

Gap Inc. | San Diego County Area, CA (26 Stores) | OCT 2020 – MAR 2025

- Oversaw asset protection operations across 26 retail locations, safeguarding company assets and maintaining a secure environment for staff and customers.
- In 2024 led investigations into theft and fraud, recovering \$10,000 in fraudulent credit and resolving cases with \$60,000 in prosecutable value.
- Collaborated with law enforcement to facilitate arrests and successful prosecutions, supporting legal outcomes.
- Implemented loss prevention policies and fraud detection systems, reducing incidents and chargebacks across assigned stores.
- Trained store teams on security protocols, incident reporting, and risk mitigation, improving compliance and response readiness.
- Utilized reporting tools (Power BI, Excel) to analyze incident data, present findings to leadership, and inform strategic decisions.

PROJECTS

Patristics RAG Agent Demo – Personal | Remote

(Python, LangChain, Chroma, Gradio, Ollama, Docker, Hugging Face Spaces, GitHub Actions, uv)

[\[Project Link\]](#)

- Built a retrieval-augmented generation (RAG) agent using LangChain and Chroma to serve context-aware answers over a custom document set.
- Developed a Gradio-based UI and integrated local, privacy-first LLM inference via Ollama.
- Containerized the application with Docker and deployed to Hugging Face Spaces, using GitHub Actions for CI/CD, security checks (pip-audit, CodeQL), and reproducible environments with uv.

Mechanic Shop API – Coding Temple | Remote

(Python, Flask, SQLAlchemy, PostgreSQL, JWT, REST, Swagger/OpenAPI, GitHub Actions, Render)

[\[Project Link\]](#)

- Designed a RESTful API for managing staff, tickets, customers, and inventory using Flask and SQLAlchemy ORM.
- Implemented JWT authentication, input validation, and rate limiting to secure API access.
- Documented endpoints with Swagger/OpenAPI and configured automated testing and CI/CD to Render via GitHub Actions.

Advanced E-Commerce Web App – Coding Temple | Remote

(React, TypeScript, Redux Toolkit, TanStack Query, Firebase Auth, Firestore, Jest, GitHub Actions, Vercel)

[\[Project Link\]](#)

- Developed a full-stack e-commerce application with real-time product catalog, shopping cart, and Firebase-based user authentication.
- Managed client state and data fetching with Redux Toolkit and TanStack Query to improve performance and UX.
- Implemented Jest tests and a CI/CD pipeline with GitHub Actions for automated testing and deployment to Vercel.

EDUCATION

Coding Temple, Certificate - Software Engineering

California State University San Marcos, B.A. Psychology, Minor in French

ACCOLADES & ACHIEVEMENTS

Asset Protection Coordinator: Gap Inc. | OCT 2020 – MAR 2025

- Awarded badges of recognition by VP of Asset Protection (2022, 2025) and AP Zone Director (2025) for exceptional leadership and successful investigations.
- Recognized by San Diego Police Department (2025) for exemplary partnership, incident reporting, and court testimony supporting investigations.
